

DRIVER BUBBLE

The Driver Bubble that keeps you safe!

The RVE Driver Bubble is a simple, intuitive flexible screen that protects drivers and passengers alike.

Creates a Safe Zone and Peace of Mind in commercial applications, taxis and rideshare vehicles.

Designed to protect all drivers and passengers

- Fire Retardant and UV rated clear PVC for durability and flexibility.
- Over 90% barrier between drivers and passengers from droplets, spray, physical and social distancing.
- Safety – Does not interfere with vehicle safety systems including Side Impact Curtain Airbags
- Does not damage vehicle interior
- Clear barrier - Mirrors still visible and occupants can communicate.
- Cleaning – Spray with detergent and a wipe off with soft cloth.
- Installation - Quick and easy, and compatible with almost any vehicle. Easy to remove when not in use.

Keeps Drivers from everyday exposure and risks

The RVE Driver Bubble is a long term solution to deter passengers from connecting with the driver zone. The screen may also provide a defensive security barrier between drivers and passengers.

May assist in the prevention and spread of viruses and everyday germs, illnesses and diseases. Physical barrier can protect you from germs transmitted via body fluids and direct contact.

The RVE Driver Bubble may also deter ill-intentioned passengers attempting to distract the driver or interfere with vehicle controls.
